

## Special Issue

# Advanced Approaches for Postfire Restoration of Forest Ecosystems

### Message from the Guest Editor

Dear colleagues, During the last several decades, there has been an increase in the rate of forest fires at a global scale. Even though many forest ecosystems have developed adapted mechanisms related to fire, there also many forest ecosystems that present low fire adaptation or no adaptation, and thus, human restoration actions are needed in order to conduct forest re-establishment. The observed increase of fire events in the last years shows that forest fires have extended towards forest ecosystems which are not adapted to fire. Taking into consideration the various scenarios of climate changes, tackling this problem becomes even more imperative, since a great number of fires are expected to appear in these ecosystems due to the increase of temperatures and the frequency of extreme weather events. The current Special Issue aims to publish highly rated research results throughout the world on innovative and effective ways to conduct the postfire restoration of burned forest ecosystems. Climate change parameters can be modified in the methodological approach in order to achieve reliable outputs.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
