

Special Issue

Wildlife Management and Conservation in Forests Ecosystems

Message from the Guest Editors

The monitoring and management of forest wildlife are important for maintaining global ecological balance, especially in times of climate change, the emergence of new diseases, deforestation, and poaching. Due to the limitations of existing models for the protection and management of forest wildlife, it is often not possible to effectively respond to the aforementioned challenges.

In order to effectively conserve species significant for forest ecosystems, new approaches to monitoring, tracking health status, preventing damage, and implementing management policies are essential for forest wildlife on a global level.

This Special Issue invites authors to publish scientific papers and reviews that will make a scientific contribution to the knowledge of forest wildlife management, wildlife species interactions, and forest wildlife conservation and protection. Also, we welcome papers that expand our understanding of the biology and ecology of endangered and poorly researched species of forest birds and mammals and assess the impact of anthropogenic burdens and interventions in the habitat on their population dynamics.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
