Forest Recreation and Landscape Protection

Message from the Guest Editor

Forest recreation and landscape protection are two of the main pillars of the environment, and in the last century they became important activities for people. Forest recreation focuses on forest as a main destination for public recreational activities from many points of view, and landscape protection refers to the conservation, development, and restoration of the functionality of natural beauties so that they are perfectly balanced by nature. Landscape protection also refers, to the capacity of natural resources to regenerate themselves and sustain the inner development of human settlements. Urban and peri-urban forests became a real place for recreational activities of the population living in the big cities of the world. The landscape protection is imposed too, not only for scientific ecologic reasons, but also for social and cultural ones, and that is why the driving mechanisms for managing future forests should be better understood. So, we encourage studies from all fields, to contribute to this Special Issue in order to promote knowledge and adaptation strategies for an efficient intersection of forests exploitation and conservation (forest management).

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
