Mechanism of Interaction between Root and Fungi

Message from the Guest Editors

Tree roots are constantly challenged by soil-inhabiting fungi that may not have beneficial or adverse effects on plant growth and development. Interactions between root and fungi are very complex and a largely unrecognized aspect of trees physiology. Between dangerous fungal pathogens and beneficial mutualists, there are numerous context-dependent intermediate states, including part-saprophytes or mycorrhizal partners decreasing plant growth. The result of relationships between roots and fungi can be important in carbon and other nutrient cycling, and in coping with forest trees with adverse environmental conditions due to climate change. This Special Issue focuses on environmental and endogenous factors that can influence the establishment of various types of interaction between tree roots and fungi. We strongly encourage studies on morphological, anatomical, ecophysiological, and molecular aspects of root and fungi interactions.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
