

## Special Issue

# Conservation and Restoration of Forest Biodiversity

### Message from the Guest Editors

Forest biodiversity provides multiple ecosystem functions and services around the world. However, high biodiversity extinction risks exist widely in different forest biomes due to global changes in climate and land use. Therefore, effective tools are required to address the issues of species diversity and ecosystem loss depending on different biomes, e.g., tropical, temperate, and boreal biomes. We should systematically evaluate the impact of environmental changes on forest biodiversity across different spatial scales, from community to global scales, and provide new insights for guiding the protection of forests. Furthermore, conserving and restoring forest biodiversity is critical for environmental management and global assessment. This Special Issue aims to comprehensively explore the effects of environmental changes on vascular plants in forest biomes across different spatial scales, from global to local scales. We welcome studies utilizing interdisciplinary approaches, field experiments, modeling, and novel methodologies to advance our understanding of the conservation and restoration of forest biodiversity.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
