

Special Issue

Silviculture and Management of Boreal Forests

Message from the Guest Editor

The aim of this Special Issue is to document recent advances in silviculture and management of boreal forests with particular emphasis on managing boreal forests for a broad range of services and adaptation to climate change. We invite original research and review papers covering a range of topics relating to the silviculture and management of Boreal forests that demonstrate and compare short-term and long-term outcomes of practices in relation to their impacts on tree growth, yield, biodiversity, economics, resilience, and other values.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
