

## Special Issue

# Silviculture for Restoration and Regeneration

### Message from the Guest Editors

This Special Issue of *Forests* is focused on how silvicultural practices can achieve ecological restoration or regeneration goals. Research articles may focus on stand-level silvicultural treatments and their effects on restoration parameters such as vegetation composition, stand structure, tree growth, or wildlife species populations or use. Articles can focus on how silvicultural treatments affect forest health or mitigate the effects of climate change in degraded or damaged stands. Articles evaluating silvicultural treatment impacts on regeneration, either natural or artificial, are welcome. Articles can address basic questions, such as effects on water uptake or physiological conditions of regeneration. Applied research, such as how economic outcomes and timber quality are affected by restoration or regeneration treatments, are also welcome.

#### Keywords

- Degradation
- Desired future condition
- Disturbance
- Ecological restoration
- Regeneration harvesting
- Silvicultural treatments

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
