

Special Issue

Impact of Biofuel Harvest on Nutrient and Carbon Cycles and Soil Content

Message from the Guest Editor

Dear colleague, Climate change and increased interest in renewable energy are nowadays of major concern in all management rules to mitigate greenhouse gas emissions and reduce the energy dependence on fossil fuels. The commitments made at different levels aim to rank the wood energy sector first to increase the share of renewable energies in the total energy mix. Biofuel harvests can affect nutrient and carbon cycles either by the harvesting processes, or the management after harvest. We invite manuscripts for a Special Issue on the *Impact of Biofuel Harvest on Nutrient and Carbon Cycles and Soil Content*. We encourage the submission of manuscripts that provide new information on a broad range of topics, including: 1) effects of biofuel harvesting on soil carbon and nutrient contents, cycles, 2) effects of biofuel harvesting on biodiversity, 3) quantification of nutrient returns through pre-drying, 4) technical solutions to let more leaves and fine woody debris on soil, 5) mitigating solutions to prevent loss of soil fertility, such as ash amendments, 6) modeling approaches that improve simulations of nutrient exportations.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
