

Special Issue

Role of Soil Organisms in Soil Formation and Nutrient Circulation in Forest Ecosystems

Message from the Guest Editor

Soil represents a very complex environment, and interactions amongst soil biotic and abiotic components govern rates of key ecological processes such as primary production, biogeochemical cycles, carbon fluxes, and hydrological regimes. Soils also harbor tremendous biodiversity, and soil organisms are at the centre of complex above- and belowground interactions. The soil biota also plays a principal role in soil formation. This Special Issue will deal with these abovementioned topics in relation to ecosystem functioning, soil formation, and nutrient cycling.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
