

## Special Issue

# Forest Structural Characteristics and Their Relationship with Ecosystem Services and Functions

### Message from the Guest Editor

Forest structural characteristics such as structural heterogeneity, species composition, tree density, and mean tree size are known to have major impacts on forest functions and associated ecosystem services. They drive the spatial and temporal dynamics of key resources and thus impact the interactions between trees and, in the end, forest dynamics and functioning. Even if we now know that forest structural characteristics plays a key role in driving master functions and some ecosystem services, there are still important gaps in our knowledge. For instance, tree spatial heterogeneity at the stand scale and its effects on forest functions and ecosystem services have been poorly investigated. This Special Issue aims to gather more insights on these complex topics by publishing high-quality papers investigating the relationships between structural characteristics and both forest functions and ecosystem services in managed or unmanaged forest ecosystems all over the world.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
