

## Special Issue

# Economic Research on Forest Ecosystem Services

### Message from the Guest Editors

Current developments in ES valuation identify the need to value forest goods and services from collective, transdisciplinary, local and dynamic perspectives in order to provide information to generate and support decisions and policies in complex areas under dynamic scenarios of climate change, loss of biodiversity, market volatility and changes in the preferences of stakeholders. From the methodological side, current research lines include valuations considering both costs and benefits trade-offs and multiple uses of ecosystem goods and/or services considering, their role in defining the economic, social and cultural development of society.

- Practical uses of valuation in forest management;
- Valuation of forest non-market goods and services;
- Challenges in the valuation of forest ES;
- Valuation of the dynamics of change in ES and factors affecting them;
- Identification of boundaries on values depending on the use of ES;
- Innovative methodological approaches;
- Transversality of the valuation;
- Diversity of interests and values of different stakeholders;
- Valuation of environmental catastrophes on the provision of ecosystem services.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
