

Special Issue

Perspectives of the Sustainable Livelihood in Forest Management

Message from the Guest Editor

Forest can play an important role in economics growth by providing goods and services. Forests provide a wide range of social benefits. Forests are also important in mitigating the effect of climate change, protection of biodiversity, etc. Forest and forest products play a critical role in supporting the livelihood of people. About 1/8 of the world population either lives in forests or their lives are somehow dependent on forests (FAO, 2005). Local communities can play a significant role in managing the forests and reducing forest degradation. Forest management and policy require a transition from traditional wood production management to prioritizing social needs and sustainable livelihoods. This Special Issue provides an opportunity for researchers to present the results of studies on sustainable livelihood in forest management and forest utilization. Potential topics include, but are not limited to:

- Participatory forest management;
- Community forestry;
- Sustainable management of non-timber forest products;
- Socioeconomics values of forests.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
