Influence of Climate Change on Tree Growth and Forest Ecosystems

Message from the Guest Editors

Recent research has shown that climate change is already altering tree species ranges, mortality and growth rates. Recent analyses of the potential effects of climate change on tree growth in Europe and America have suggested that important timber species may lose suitable habitat and suffer adversely from a combination of warming trends and reduced growing season precipitation. In contrast, other species may actually expand their range and potentially show improved growth rates in parts of their existing range, or show potential for their use as commercial species in new regions. Research has uncovered species-specific growth responses to climate change. In addition, the complex interactions between tree growth and temperature, water, nutrients, and carbon dioxide are also modulated by inter- and intra-specific competition levels. The state-of-the-art currently focuses on understanding how forest ecosystems, and not only tree species, could respond to climate change.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2024).
