Tree Species Selection under Drought

Message from the Guest Editor

Drought stress is one of the most important risk factors for many forests. It is our goal to appraise uncertainty in species selection in forest ecology, especially focused to the effects of low water availability on tree physiology and species distribution. The main aim of this Special Issue is to describe current and future shifts in tree species posed by drought conditions, due to changes in tree physiology and demography occurring in natural forests or timberlands. We are also interested in all descriptions of changes in species distribution associated with a rise in drought conditions; all new findings involving physiological adaptations to cope with dry environments; as well as works on seedling survival and development. We encourage authors of studies from related fields to contribute to this Special Issue. We are soliciting papers describing original research, but reviews are also welcome.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2024).
