

Special Issue

Soil Carbon Storage in Forests: Dynamics and Management

Message from the Guest Editors

Soil carbon storage in forests plays a crucial role in the global carbon cycle and climate change mitigation. Forest management practices can significantly influence soil carbon dynamics and storage. This Special Issue of *Forests* aims to explore the dynamics of soil carbon storage in forests and the management strategies for enhancing it. Research articles in this Special Issue may focus on various aspects of soil carbon storage in forests, including the impact of forest management practices (e.g., logging, thinning, reforestation, and afforestation) on soil carbon stocks. Studies investigating the effects of climate change, land use change, and disturbances (e.g., wildfire, insect outbreaks) on soil carbon storage are also welcome. Furthermore, this Special Issue encourages submissions that explore the role of soil carbon in forest ecosystem functioning and services, as well as the potential trade-offs and synergies between soil carbon storage and other ecosystem services (e.g., biodiversity conservation, water regulation, and timber production). We also invite contributions that investigate the social, economic, and policy dimensions of managing soil carbon in forests.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
