Sustainable Utilization and Life Cycle Analysis of Forest Products

Message from the Guest Editors

Forests cover today about 4 billion hectares in the world and people all depend directly or indirectly on forests products such as wood, food, fibers, energy, and medicinal compounds but also climate, water and carbon cycle regulation, and other 'nontangible' services. Recently the IPCC underlined that: "In the long term, a sustainable forest management strategy aimed at maintaining or increasing forest carbon stocks, while producing an annual sustained yield of timber, fiber, or energy from the forest, will generate the largest sustained mitigation benefit". Life cycle assessment techniques can be used to support various types of decision-making in relation to the development, use, and trade of new products or policy-making. This SI plans to give an overview of the results of the most recent advances in the field of LCA practices to evaluate the sustainable utilization of different forest products, from the most utilized wood and its derivatives to innovative ones, considering as main products also the social-environmental service as the improvement of society's independence on non-renewable resources, tourism, biodiversity, climate mitigation, and others.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
