

## Special Issue

# Frontiers in Modification of Wood and Wood-Based Composites

### Message from the Guest Editors

Dimensional stability and biological durability are very critical criteria for different types of wood. The hygroscopic nature of wood and wood-based composites is responsible for the dimensional instability and decay of wooden structures. Suitable modification methods to reduce the hygroscopic behavior of wood are highly sought after. Wood modification refers to the process of altering the properties of a material through the use of chemical, mechanical, physical, or biological methods. In the interest of environmental protection, more environmentally friendly treatments utilizing non-toxic chemicals are strongly encouraged. As a result, advancements in the modification of wood and wood-based composites are critical. This Special Issue aimed to collect high-quality original research and systematic review articles on the most recent advancements in wood and wood-based composites modification technologies. Additionally, this Special Issue will feature selected contributions on the modification of non-wood materials such as bamboo and palm, as well as the procedure for the modification, characterization, and applications of modified wood and wood-based composites.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
