

Special Issue

Managing for Wood Quality: Analytics, Operational Tools and Applied Solutions

Message from the Guest Editor

This Special Issue will attempt to benchmark the state-of-knowledge and highlight research efforts in these areas. For example, contributions that aim to (1) quantify or model conceptual or empirical linkages between external tree morphology (e.g., crown structure) or internal fibre attributes (e.g., wood density, microfibril angle or modulus of elasticity) and end-product potential, (2) advance in-forest non-destructive methodologies for use in estimating internal wood quality attributes (e.g., acoustics), or (3) develop and (or) demonstrate crop planning decision-support analogues for use in managing wood quality outcomes (e.g., density management models), would all be within the scope of this Special Issue. Furthermore, contributions that attempt to incorporate the consequences of climate change on wood quality determinates or management decision-making are also strongly encouraged.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
