Special Issue

Applications of Wood Technology in Forestry Products

Message from the Guest Editors

Forest products, as our most-used renewable resource, are traditionally used in the building sector; however, supplies are finite. With the accelerated advancement of new technology, increasing studies about wood quality have been conducted in response to the rapid development of wood in construction materials. However, this Special Issue will provide insight into how wood technology is used to improve wood quality in various kinds of forest products, as opposed to construction materials only. Through the insights of these contributing papers, we hope to help solve the supply shortage of forest products so as to achieve effective resource management and use. This Special Issue welcomes authors who are engaged in studying wood science, wood technology, or wood processing to submit papers. Potential topics include, but are not limited to:

- Thermal modification and protection of wood;
- Wood-filled composite materials;
- Building materials and technologies;
- Wood science and processing;
- Drying and thermal moisture treatment of materials.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa
Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:
JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
