Wood Anatomy and Evaluation of Wood Structures and Their Modifications—2nd Edition

Message from the Guest Editors

Wood is a remarkably complex and fascinating biological structure and natural lignocellulosic polymer. Xylem provides water with conductive function, structural support to the tree, as well as serving in the storage of nutrients. Xylem is built with different cell types and structures, which not only evolved over hundreds of millions of years to accomplish their function, but also undergo a continuous and rapid adaptation during their lifetime. Wood anatomy and atypical wood structures can serve as markers to reconstruct events in time, and they can provide important information regarding the adaptive response to functional and ecological variations and the recovery ability of a tree. Moreover, understanding xylem structures and responses may be useful in predicting functional trends and climate change impacts on woody plants. This Special Issue aims to provide an overview of the latest knowledge on xylem anatomy evaluation and the codification of xylem structures linked with their functional and ecological rule.

Guest Editors

Prof. Dr. Veronica De Micco

Dr. Maks Merela

Dr. Angela Balzano

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
