

Special Issue

Contribution of Forestry Ecological Restoration Projects to the Realization of Sustainable Development Goals

Message from the Guest Editors

In order to protect and restore ecosystems, countries around the world have implemented a series of unprecedented forestry ecological restoration projects (FERPs). FERPs are not only an important way to achieve the 15th Sustainable Development Goal (SDG) of the United Nations but it is also closely linked to many other SDGs. This Special Issue aims to provide an overview of important research in the following areas: (1) theoretical logic, implementation framework, and research progress of FERPs for the realization of SDGs; (2) evaluation of the impacts of FERPs on terrestrial ecosystems (including land cover, vegetation cover, ecosystem services, etc.) in the context of the SDGs; (3) evaluation of the impacts of FERPs on environmental impacts (including air pollution, water purification, carbon emissions, etc.) in the context of the SDGs; (4) evaluation of the impacts of FERPs on socio-economic impacts (including farm household income, rural economic structure, food security, etc.) in the context of the SDGs; and (4) evaluation of the impacts of FERPs on cutting-edge methods (including causal inference, AI, etc.).

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
