

Special Issue

Contributions of Agroforestry to Ecosystem Services and Climate Action

Message from the Guest Editors

Agroforestry systems are multifunctional systems that can meet economic, social and environmental objectives by diversifying farm products and services. Agroforestry systems also play an important role in climate action, given their role in carbon sequestration and water regulation, and enable farmers to better adapt to climate change, as the fruit, nut and berry trees of such systems are often more tolerant than seasonal crops and so can increase the diversity and resilience of food production.

This Special Issue is aimed at exploring the contribution of agroforestry systems to the supply of ecosystem services (provisional, regulatory, cultural) and to deal with climate change, both in terms of mitigation and adaptation, in particular from wide and integrated economic, social and ecosystem perspectives at multiple scales and in diverse regions of the world.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
