

Special Issue

Benefits of the Urban Forest under Global Change

Message from the Guest Editor

We invite authors to submit a paper to a Special Issue of *Forests* entitled “The Benefits of the Urban Forest under Global Change”. Recent research has identified a range of urban tree benefits including, but not limited to, improved air quality, storm-water management, energy conservation, carbon sequestration, crime prevention, and improved public health. We welcome papers that expand our understanding of the benefits that the urban trees provide us or identify management strategies to optimize these benefits. In particular, we are interested in how management adapts to global changes such as climate change or the spread of invasive species. Papers can be original research, reviews, or commentaries.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
