Forest and Wood Vegetation Carbon Stores and Sequestration

Message from the Guest Editor

The global clearing of woody vegetation is a greenhouse gas emission source. While there is evidence that the terrestrial carbon sink has increased, recent widespread forest mortality climate related events indicate these sinks' vulnerability. This has implications for global approaches to climate change mitigation that involve the creation of forest and woody vegetation sinks.

Forest adaptation and mitigation are not goals within their own right; these activities further the objectives of agricultural production and sustain environmental services and, consequently, they support community livelihoods. Without a strong financial incentive, these will be the objectives that can drive the adoption of forest management policies that increase forest carbon sequestration. Dr. Michael Battaglia

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
