Carbon Stock and Sequestration in Forest Ecosystems

Message from the Guest Editors

You are kindly invited to submit your research article to the Special Issue. Forest ecosystems play a vital role in global climate change mitigation and adaptation through carbon sequestration from the atmosphere. However, there are still large spatial and temporal variabilities in forest carbon stock and sequestration, in particular in the context of global climate changes. In addition, artificial plantations and management practices also affect the carbon stock and carbon sequestration in forest ecosystems. Under the global goals of reaching peak carbon emissions and carbon neutrality in the next few decades, the role of forest carbon stock and sequestration are emphasized, and its potential contribution ought to be assessed. We kindly invite you contribute any of your work that focuses on subjects including, but not limited to: forest management practices and silvicultural treatments, from the whole ecosystem; the responses of critical ecological processes and their interactions with other environmental or human disturbances; practical sustainable forest management strategies developed from scientific experimental studies or the synthesis of data from published papers.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
