

## Special Issue

# Advanced Technologies in Improving the Design Life and Durability of Timber

### Message from the Guest Editors

Timber is one of most utilized material by humans for buildings, furniture, utility poles, and bridges due to its sustainability, sequestration of carbon during its service life, insulation capacity, mechanical resistance, anti-seismic properties, and its aesthetic aspect. A further advantage of this material is the end-life that is strongly influenced by the treatments or chemical modification applied to the timber for increasing its service life. The disadvantages of this material are mainly due to its organic composition, which can be destroyed by biotic (wood decay) and abiotic (weathering, fire) factors. This Special Issue considers all the measures against biotic and abiotic factors for extending the service life of timber. We welcome contributions from different scientists working with wood, in the different aspects required for extending its service life.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
