Disturbances Effect Forest Carbon Cycling

Message from the Guest Editor

Forests are an important element of the atmospheric composition, contributing and removing greenhouse gases from the atmosphere, a phenomena detectable at a global scale. Changing environmental conditions are changing an important driver of this carbon exchange: disturbances. The effects of disturbances on forest carbon are not well quantified and have a potentially important impact on the amount of carbon stored in forest systems, and on the carbon exchanged between forest and atmosphere. Stand-replacing disturbances may contribute to changing the course of forest dynamics, and therefore of forest carbon. However, non-stand-replacing disturbances, such as drought, insects and pathogens, may also have a cumulative impact of large proportion. None of these issues is well understood or quantified.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
