

Special Issue

Effect of Drought on Forests— Plant Water Relations and Ecological Consequences

Message from the Guest Editors

The questions that we seek to answer in this Special Issue range in scale and include:

- Where and when does hydraulic failure occur?
- Why are some species more sensitive than others?
- How does the tree sense water shortage and what are its main responses?
- What can we learn from long-term drought experiments?
- How do flux towers help us to understand the dynamic response to drought?
- What are the best remotely sensed indices to track the impact of drought?
- What determines the transition from forest to savanna?
- What are the key processes which should be represented in models?
- How will forests respond to drought at regional scales?
- How will biodiversity be influenced by drought?

We invite authors for this Special Issue to address these questions. We welcome manuscripts reporting (i) reviews of controversial topics, (ii) meta-analysis of already-published work, and (iii) original investigations

Guest Editors

Prof. Dr. John Grace

School of GeoSciences, University of Edinburgh, Edinburgh EH9 3FF, Midlothian, UK

Prof. Dr. Maurizio Mencuccini

Centre for Ecological Research and Forestry Applications (CREAF), E-08193 Bellaterra (Cerdanyola del Vallès), Barcelona, Spain

Deadline for manuscript submissions

closed (30 September 2017)

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
