

Special Issue

Economy and Sustainability of Agroforestry Ecosystems

Message from the Guest Editors

Agroforestry has increasingly gained attention in science as well as for its implementation on farms. Agroforestry is seen as a major method to improve farmers' livelihoods, while substantially contributing to mitigate climate change and providing many other kinds of ecosystem services. It combines the advantages of increasing the number of trees, while not displacing other land uses, in particular food production. On the other hand, agroforestry is being widely confronted with negative perceptions that it compromises crop yields and farm incomes. This special issue aims at contributions focusing on the following fields: 1. Economy of agroforestry systems from farm level to landscape or regional level; 2. The role of agroforestry products (timber, biomass, etc.) in the creation of regional value chains; 3. Impeding and enabling factors of agroforestry adoption; 4. Resilience and sustainability of agroforestry systems, including both societal and environmental aspects

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
