

Special Issue

Expansion of Naturally Regenerated Forest

Message from the Guest Editors

Forests cover 31% of the global land area, and are home to most of Earth's terrestrial biodiversity. However, deforestation and forest degradation continue to take place at alarming rates in some parts of the world, whereas in others the trend has been reversed with forests expanding over new areas.

Factors affecting tree growth rates, seed production and dispersal, seedlings establishment, shrubs species colonization, microsites availability, soil conditions, as well as the complex interactions that occur within and between all levels of forest biological diversity (local, ecosystem, landscape, species, population, and genetic) in the colonization process will be topics of interest for this Special Issue. We also welcome all manuscripts discussing new management and implementation actions to reverse deforestation and biodiversity loss (all life forms found within forested areas and the ecological roles they perform).

This Special Issue will improve our understanding of constraints for natural forest expansion all around the world, while providing practical recommendations for the reforestation of degraded ecosystems.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
