

Special Issue

Forest Bathing and Forests for Public Health

Message from the Guest Editors

Humans have long enjoyed forest environments because of their quiet atmosphere, beautiful scenery, mild climate, pleasant aromas, and fresh, clean air. In Japan, a national health programme for forest bathing, or shinrin-yoku, began to be introduced in 1982 by the Forest Agency of Japan for the stress management of workers. Shinrin in Japanese means 'forest', and yoku means 'bath'. So shinrin-yoku means bathing in the forest atmosphere, or taking in the forest through our senses. Since 2004, serial studies have been conducted to investigate the effects of forest bathing/shinrin-yoku on human health in Japan. We have established a new medical science called forest medicine. Forest medicine is a new interdisciplinary science, belonging to the categories of alternative medicine, environmental medicine and preventive medicine, which studies the effects of forest bathing on human health. It has been reported that forest bathing has multiple beneficial effects on human health.

Therefore, forests are very important for public health. To expand the philosophy and concept of forest medicine worldwide, we have planned this Special Issue and expect your contribution.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
