

Special Issue

Forest Biomass and Carbon Estimation

Message from the Guest Editor

Forests play a critical role in the functioning of global ecosystems and climate, including serving as an important CO₂ sink. Recently, we have seen intensified efforts by forest scientists around the world to identify the gaps in our understanding and to quantify the role of forests in carbon sequestration and the carbon cycle. The major focus has been on the development of allometric models to estimate aboveground biomass with limited work done in the estimation of belowground biomass. Furthermore, the estimation of forest carbon has been indirect through the assumed carbon content percent of dry biomass. This Special Issue on *Forest Biomass and Carbon Estimation* aims to present the state-of-the-art developments and best practices in forest biomass and carbon estimation. The topics will include sampling and estimation methods for forest biomass and carbon; addressing forest biomass to forest carbon link; and approaches and challenges in integrating data from various sources to improve the accuracy at local, regional, national, and global scale.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
