# Framing Forest Carbon for Policy in Temperate North America: Baby Steps toward National Carbon Goals

### Message from the Guest Editors

How forest carbon offsets can meet national, regional, and state or provincial CO<sub>2</sub> emissions reduction goals has been a focus of increasing research and advocacy attention for a decade or more. Because the biological, environmental, governance, and forest management options vary so widely across the commitments, these questions must be faced with a strong local emphasis. For this reason, we seek papers addressing the issues in temperate North America. *Forests* seeks submissions of manuscripts that address, in productive ways, the interface between science and policy in this field. We seek papers that attempt to frame important issues in the context of a real world with multiple policy goals and constraints, including costs, and that assemble and intelligently review a range of relevant existing literature on the topic.

Process: please send a one page abstract or outline of proposed piece and we will respond. Proposals offering results on single stands or forest types, big data modeling exercises, or without clear policy analysis and framing will be referred to the normal *Forests* editorial process for review and consideration in the normal course.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

---

### Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,  
I-25121 Brescia, Italy

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
