# **Special Issue**

### Environmental Valuation and Sustainable Management of Forests

### Message from the Guest Editor

Forests provide multiple nonmarketed goods and services, and several economic valuation methods have emerged to analyze them since the middle of the 20th century. Some of them are based on revealed preferences-for example, the travel cost and the hedonic pricing method. Others are based on stated preferences-for example, the contingent valuation and the choice experiments. Based on these methods, many applications analyzed the economic relevance of several nonwood forest products (NWFPs) such as recreation, biodiversity, carbon sinks, etc. Environmental valuation is currently a well stablished research area in the field of environmental economics. This Special Issue focuses on the "Economic Valuation and Sustainable Management of Forests". It promotes knowledge for the future management of forest ecosystems, dealing with topics such as resilience, adaptation, biodiversity, recreation, conservation, biotic and abiotic risks, cultural values, etc. We cordially invite you to submit a manuscript for this Special Issue. We are mainly looking for environmental valuation applications, although methodological papers are also welcome.

### About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and crossdisciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

#### Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

### Author Benefits

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
