

Special Issue

Forest Plant Phytochemicals: Current Trends, Challenges and Perspectives for Application

Message from the Guest Editor

There are several aromatic medicinal plants that grow in forest ecosystems. They have been applied traditionally in several medicinal preparations. In total, 50% of the commercial essential oils are sourced in forest or wild-crafted. The research and publications on these can lead to discovery of new medicines. This Special Issue welcomes both research and review papers on the most recent and innovative developments of forest-based natural products. We hope that this Special Issue can further encourage and promote the scientific contributions of researchers in this field.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
