

Special Issue

Forest Product Markets, Sustainability, and Societal Impacts

Message from the Guest Editor

This Special Issue of *Forests* guides forestland managers and academicians through current research findings to assess forest product markets, their impacts on local, national, and global markets, and the influences on sustainability. Each manuscript will define markets and their geographic extent for (a) natural resource sources, (b) processing expertise, and (c) final product markets. Forest products include physical products produced through wood harvest, processing, and market delivery, as well as natural processes and societal sustainability delivered by the management of forestlands. Manuscripts will include research in:

- Wood product markets;
- Economics to articulate and measure achievements of desired ownership goals;
- New or previously underutilized forest product amenities with potential for expansion;
- Societal achievement through forestland management utilization.

Guest Editor

Dr. William E. Schlosser
School of Environment, Washington State University, Pullman, WA, USA

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
