

Special Issue

Landslides in Forests around the World: Causes and Mitigation

Message from the Guest Editors

Landslides are one of the most pervasive natural hazards and usually result in enormous human casualties and property losses. With population growth, the expansion of infrastructure, and increased agricultural activity in forest areas, the significance of landslides is set to increase in the future. This Special Issue aims to collect the latest developments and applications of both basic and applied research on forest landslides, with particular attention to the causes of and solutions to landslides. Research can focus, but is not limited to, climate change, extreme rainfall, earthquakes, and human-activity-induced landslides in forests. Research also can pay attention to the occurrence mechanism, susceptibility, hazard, and risk of landslides. The application research of artificial intelligence methods such as machine learning/deep learning, and remote sensing technologies such as optical remote sensing, LiDAR, and InSAR are particularly welcome. Innovative methods and original applications would be appropriate.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
