

Special Issue

Forests, Plantations, and Land Use

Message from the Guest Editors

Planted forests have increased around the world to meet timber supply, economic development, or landscape restoration goals. However, experience with expansion of planted forests has been mixed. Some countries have successfully implemented widely supported. In other places, plantation development has been controversial, with few benefits for local people, the wider economy or the environment. While international goals have been set to restore forest cover and increase planted forests, since 2010, the rate of increase in planted forests has slowed. It is unclear where planted forests might be located, or how they will be managed, to achieve desired objectives. New models of development for planted forests are likely to be required to achieve global targets.

This Special Issue aims to present current research on planted forests and plantations and best-practice approaches to plantation development. The topics will include land tenure and allocation; social issues, regulation and enforcement; finance, incentives, and education programs; linking value chains for plantation timber; and approaches for integrating environmental values and benefits.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
