

Special Issue

Impacts of Climate Change— Selected Papers from FowiTa German Forest Sciences Conference (Sessions 1–5)

Message from the Guest Editor

Climate change is still a major issue for forestry and forest sciences and has impacts on forests in a multitude of ways. The Special Issue covers all aspects of climate change on forests spanning topics from the natural sciences to social sciences and economics. It especially welcomes papers covering the following aspects: Impacts of climate change on the species distribution of forest ecosystems; Impacts of climate change on abiotic and biotic hazards in forests; Economic impacts of climate change on forests; Risk management in forestry under climate change; Adaptation strategies to climate change for forest management; Mitigation vs. adaptation; Modelling of forest ecosystems under different climate change scenarios.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
