Special Issue

Genetic Diversity and Conservation of Forest Tree Species

Message from the Guest Editors

Forests play a key ecological role in the flora and fauna community, representing a significant resource of biodiversity in terms of species and habitats. However, in recent decades, forest biodiversity has been threatened by deforestation, pollution, and climate change. Thus, knowledge of the genetic variability is a key element to identify endangered populations and species, and to define management strategies for their future conservation. The aim of this Special Issue entitled "Genetic Diversity and Conservation of Forest Tree Species" is to improve the knowledge of geographic distribution of neutral and adaptive genetic diversity of widespread, endemic, and endangered tree species, helping toward their conservation. We encourage the submission of original research papers as well as review papers dealing with new advances in tree population genetics, adaptive genetics, landscape genomics, conservation genetics, and resilience of tree species to pathogens.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and crossdisciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
