Genetic Resources and Adaptive Management of Conifers in a Changing World

Message from the Guest Editor

Conifer forests have been widely exploited and transformed by forestry (e.g., by long-range seed trade or selection for cultivation). Around the world, these forests currently display an unexpected vulnerability due to ongoing rapid climatic changes, extreme events, and the invasions of antagonists, which emphasizes the importance of their genetic resources, supporting adaptivity, and resilience. There exists an urgent need to translate research information into frameworks for conserving genetic resources and to support the resilience of conifer species to projected changes and threats. Both ecological and genetic research may significantly contribute to effective dynamic conservation and management strategies.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
