Special Issue

Forest Management and the Challenge of the Sustainable Development Goals

Message from the Guest Editors

The term sustainability has been intrinsically linked to forest management since the 18th century, when von Carlowitz used the concept of the so-called "normal forest". Since then, this concept has been assumed and developed in Forestry Science. It has considerably evolved in the last few years, including different ecosystem services linked to forestry systems.

Currently, the United Nations Sustainable Development Goals and the 2030 Agenda provide us with a set of indicators for dealing with the sustainable management of the environment and its embedded resources. Within this orientation, forests have been recognized as a key element for the achievement of the general sustainability goal. So the integration of new SDGs in forest management is a timely and significant challenge.

This Special Issue aims to collect research papers in the theoretical and applied fields dealing with the integration of the different SDGs from a forest management perspective, with the help of several analytical methodologies. We especially welcome papers that simultaneously integrate indicators belonging to diverse SDGs and addressing ecosystem services under a forest management umbrella.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
