Non-wood Forest Products

Message from the Guest Editor

Non-wood forest products (NWFPs) such as cork, fruits and nuts, mushrooms, medicinal and aromatic plants, and forage for livestock and game have been used for food, health, and cultural purposes for thousands of years. These products used to receive limited scientific, political, and media attention. However, there is now a tendency to recognize their role at the international level, as NWFPs constitute an essential resource for livelihoods in many parts of the world and play a significant role in food and nutritional and health than was previously thought. As a result, there is an increasing global interest regarding the ecology, sustainable management, and modeling of WWFPs. Additionally, the sustainable co-production of timber and NWFPs is a great new challenge for forestry scientists and managers.

In this Special Issue, we encourage studies from all fields related to NWFPs, including experimental studies, sustainable harvesting techniques, monitoring approaches and models, as well as social-ecological aspects in order to promote knowledge and to discuss current trends and future prospects of progress in these fields. Survey papers and reviews are also welcomed.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
