Nutrient Cycling through the Forest and Soil System

Message from the Guest Editors

The cycling of nutrients through the soil–plant community system is a basic reality of all vegetation-based terrestrial ecosystems, and is a necessity for their stable existence. Nevertheless, changing conditions of climate, soil and plant community autoecology enable such cycles to differentiate into a vastly different array of possible ‘solutions’, intended as combinations of processes that allow the persistence of the soil–vegetation system. It is a seductive idea to treat each ‘solution’ as a major ecosystem trait. In the field of forests, the last few years have seen a large amount of research being published, contributing to the knowledge of nutrient fluxes from different approaches; yet, most publications were actually focused on different subjects. We feel that the time has now come to start a focused debate on forest nutrient cycles, aiming at a systematic approach. Thus, we propose a Special Issue centering on this theme. In this Special Issue, we will not treat any approach as preferential to any other, and we are encouraging the submission of studies dealing with soil–forest nutrient cycles from different approaches.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
