Physiological Response of Trees to Stress

Message from the Guest Editor

One of the distinctive features of trees, especially forest trees, are the longevity of the tree species and distinct spatial arrangement of the tree crown. These characteristics are responsible for the strong relation between trees' vitality, forest stability and permanent impacts of bio- and biotical environmental factors. It is possible to denominate forest trees as an important "bio- integrator" of both local and global environment. The responses of trees to stress can be found at different spatial and temporal levels, ranging from the subcellular reactions up to the stand and ecosystem levels. At the present time, particularly climate changes, more frequently occurring extreme climatic events starting to be a big problem. Moreover, these climate events have consequences for insect/fungi attacks. It is really novel and extremely important imperative for current research orientation. Thus, encouraging intensive research, summarizing the current knowledge, and transferring the scientific achievements into praxis is of great importance.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
