

## Special Issue

# Predicting Vegetation Size Maps

### Message from the Guest Editor

The size distribution of trees in forest stands provides useful information for harvesting forest stands and for assessing the economic value, growth and yield. In addition, tree diameter and height distribution are correlated with species diversity and ecological values. It can also provide useful information on past disturbance events and the structure and successional status of a forest. The characterization of timber products and quality of ecosystem depends highly on spatial size distribution of trees in forest stand. Since it is inefficient to measure the size of all the trees, the diameter distribution is normally assessed through the stem frequency distribution. Airborne laser scanning data and other GIS information has recently comprised a revolution in technological advancements with an enormous possibility for increasing the accuracy of large-scale forest inventories and reducing their costs.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
