

## Special Issue

# Urban Open Space Conservation: Advances, Perspectives and Contribution in Enhancing Urban Sustainability

### Message from the Guest Editors

This Special Issue of *Forests* is intended as a multidisciplinary opportunity to describe innovative approaches for monitoring the past, current and future trends in urban open spaces and to propose planning instruments and interventions able to emphasize their socio-ecological role in strengthening urban green infrastructures. Topics of interest include, but are not limited to, the development of advanced quantitative and qualitative methods to monitor the abundance, characteristics (e.g., biophysical, management, functional) and trends over time of urban open areas, even related to different urbanization, planning and socio-economic patterns. Case studies on future possible trends of urban open areas under different planning scenarios are also welcome as well as those dealing with innovative approaches for modelling their contributions in terms of biodiversity conservation, ecosystem services provisioning, and ways to strengthen their inclusion into decision-making processes. Manuscripts can cover a wide range of spatial (e.g., from municipality to regional and national) and implications (e.g., planning, governance, policy) scales.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
