## Tree Acclimatization to Wind

### Message from the Guest Editor

Trees are long-living organisms that adjust their structures to the local environment. These adjustments occur on different scales, from modification of cell properties to the shape of the whole. Adjustments also occur in different compartments of the tree, from the root to the crown. Because growth conditions change over their life cycles, trees are continuously readjusting to new conditions. Wind has been identified as an important driver of stand dynamics, as well as a potential constraint on forest management. In this context, understanding how trees acclimate to partial disturbances, either manmade or natural, can be influential in better understanding stand dynamics and reducing tree vulnerability to further wind damage. For this Special Issue, we encourage contributions that address how trees acclimate to wind, especially after partial disturbances. This Special issue will accept studies looking at a diversity of scales in order to understand the importance of acclimation and the processes involved. Contributions can take the form of either research papers or comprehensive review articles.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
