

# Special Issue

## Methods and New Technologies for Wood Modification

### Message from the Guest Editors

Wood biomass is currently used in many different value chains, from wood-based products and materials to biochemical and bioenergy, and various industrial sectors. However, despite the growing attention of previous years, the cascade usage of this bioresource has not yet been optimized.

In this Special Issue we aim to present the most recent developments in the field of biomass valorization, with a particular focus on wood. The overall objective of this issue is to extend the lifespan of different bio-sourced materials so that the carbon fixed in their structure will be kept as long as possible, before it inevitably goes back into the air as carbon dioxide.

Extending the service life of bio-based products is, at present, the best way to fight climate change. It also has the advantage of reducing the need for other materials. Therefore, in this collection, we encourage submissions dealing with the following topics:

New applications for bio-based forest products;  
Thermal modifications of bioresources;  
Wood modification and preservation;  
Environmental impact of wood modification;  
Life cycle assessments and circular economy studies.

---

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
