

Special Issue

Preference for Wood, Wooden Interiors, and Wood Products

Message from the Guest Editors

As concerns grow around the sustainability of our society in its current form, there has been an increased amount of interest in recent years around the use of wood. Indeed, a growing number of consumers are exhibiting a marked preference for wood or wood products, leading to an increase in the demand for the use of wood in various buildings, including mid-to-high-rises and public and private constructions. There are various reasons wood is such an attractive material: Not only can the use of wood also contribute to protecting the global environment and achieving SDGs, but it can also enhance local economies, especially local production and consumption. Thus, this Special Issue focuses on the “Preferences for Wood, Wooden Interiors, and Wood Products” and includes papers that address evaluations of the preference for wood, the various (psychological, physiological, economical, etc.) effects of the use of wood for wooden interiors, wooden buildings and wood products, etc.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
